

Essential 8

Strategies to Mitigate Cyber Security Incidents

There is no way to guarantee that your data is always going to be 100% safe from cyber threat, but there are acknowledged strategies that organisations can adopt to mitigate risk. The Australian Cyber Security Centre [ACSC] recommends organisations implement eight essential Strategies to Mitigate Cyber Security Incidents as a baseline making it harder for adversaries to compromise systems.

TIMG Australia has implemented the E8 Baseline across all services where we handle customer data. We are constantly updating and improving our processes and are now focused on rolling the standard out across all current back-office functions.

Discover how TIMG can help your business.
